

Business

Cisco Systems, Inc., a worldwide leader in internet Protocol-based (IP) networking solutions, provides the foundation for the internet

Challenges

- **Time-critical project:** Needed to complete library characterization in three months to meet tape-out schedule
- **License constraints:** EDA licenses not scalable and not available on demand
- **Infrastructure deployment and access:** Long set-up times for EDA environment with limited compute capacity and scalability

Synopsys Solution

Synopsys Cloud offered a unique solution for Cisco to finish characterization quickly by providing unlimited EDA tool licenses and compute. Using FlexEDA pay-per-use (PPU) licensing, Cisco got access to unlimited, on-demand Synopsys PrimeLib licenses for library characterization. In addition, because this was a Synopsys Cloud SaaS deployment, it also offered the latest scalable and elastic compute resources available through Microsoft Azure. The adoption of the Synopsys Cloud SaaS solution helped Cisco

Synopsys Cloud Platform
